Good Afternoon TAG members,
Thank you for joining us today for a great meeting!

- For those that were able to attend we thank you for sharing your opinions and feedback it's a very helpful component to our planning process. If you would like us to do the breakout rooms like we did today again, or have an alternative suggestion, please let me know.
- To those that were not able to attend I would like to encourage you to review the attached presentation and reach out to us if you have any comments or questions for us.

Have a good rest of your week and take care.

Sincerely,
LA Sanitation and Environment
Water Recycling Implementation Division

Good Morning TAG members,

We look forward to meeting with you at 12:30! We are trying something a little different today. At about 1:45pm today we will go into breakout rooms. As TAG members you will have your own room and no one from City Staff, etc will be in the room with you. Please use this time to talk amongst yourselves and select 1 person to represent your collective feedback. After 15 minutes we will go back to the main room.

Please consider the following question during your breakout session:

Do the benefits of load reductions outweigh the impact of the concentration effect?

When we return from the breakout rooms we will be asking for your selected representative to provide us your feedback on the above question.

These instructions will be reviewed during the meeting as well so please feel free to ask any questions if needed.

Thank you to those attending today. I know some of you will not be able to make it but rest assured we will send out the presentation materials to all and we will follow up with you.

Sincerely,
LA Sanitation and Environment
Water Recycling Implementation Division
